

# IT PROFESSIONAL COMPLETE COLLECTION

## Stay current and prepare for certifications

Your IT department is an integral part of your business operations. It is imperative that your IT staff is well-trained on the critical technologies that keep your business running. With our IT Professional Complete Collection, you have access to all the training you need. Every IT department has multiple job functions that support numerous applications and networking technologies, as well as a myriad of technical certifications that must be maintained. This comprehensive collection includes our IT Professional Course and Resource Collections to address every one of these needs.

### Thousands of courses covering the most popular technology

You gain access to thousands of courses covering the most popular technology brands such as CompTIA, Cisco, Oracle, and Red Hat. Additionally, we are the official provider or Microsoft Office e-Learning. Not only will this collection help your users maintain their knowledge, our courses will also prepare them for over 50 of the most popular IT certifications. The courses in these libraries feature Element K's award-winning content development and delivery, including:

- **Rich, Engaging Content**—Realistic photos, activities, and graphics further develop key concepts
- **Interactive Demos**—Provide the opportunity to apply concepts and practice what you have learned.
- **Resources**—Downloadable job aids, checklists, and forms as well as glossaries of relevant terms are provided for quick reference

This impressive collection also includes our vLabs®, providing your staff with hands-on access to real equipment. vLabs give your IT department the opportunity to work with the latest technology in an open environment without risk to your production systems.

### Go beyond traditional training—give your team the resources they need

It's easy to keep your IT staff current with the latest industry trends and techniques with our Multimedia Resource collection. This multi-publisher, multi-format collection encompasses a broad range of computer concepts and skills, from technology theory and complex procedures, to practical how-to guides, articles, and videos. World-renowned content partners include Cisco Press, IBM Redbooks, and Microsoft Press.
