

An Element K e-Learning Product
Brief for your Enterprise

content

Courses that support the networking and operating systems developed by the industry leaders. Technologies and versions include:

Microsoft

- Microsoft Windows 2003 Server
- Microsoft Windows 2000
- Microsoft Windows NT 4.0
- Windows XP Professional
- Microsoft SQL 2000 Server
- Microsoft Exchange 2003 Server
- Microsoft Exchange 2000 Server
- Microsoft SQL Server 7.0
- Microsoft Internet Information Server 4.0
- Microsoft SMS 2.0
- Microsoft Project 2003 Server

Novell

- GroupWise 5.5
- Netware 6.0
- SUSE Linux

Linux

- Linux Professional Institute
- Linux Red Hat

IBM

- Lotus® Domino® 6/6.5 Administration
- Lotus® Domino Designer® 6/6.5

Also includes Unix, Sun Solaris, AS/400, and more. Support materials like online books and virtual labs are integrated in the catalog to make them readily available for Just-In-Time reference and to logically reinforce course concepts.

Networking and Operating Systems Library

The only online course and reference library an IT professional will ever need

Element K® offers the most complete library of online courses, reference, and practice labs for networking professionals. The library was created explicitly with systems engineers, administrators, and technicians in mind. These professionals design and build computer networks that include one or more server technologies, interconnect computers and devices, create and maintain accounts, and provide ongoing administration for these systems. The Element K Networking and Operating Systems library provides training for the dominant server and operating system technologies including Microsoft®, Novell, Linux, and Unix. Mainframe technologies like AS/400, still fundamental in certain industries, are also included. The library is suitable as a “Just-in-Time” reference to be used in high-pressure trouble shooting situations, as well as a formal training tool that accommodates various learning paths in the networking discipline. The integration of superior, interactive self-paced courses, popular online reference books, and live, virtual labs (Element K vLabs®) is ideal both to support IT job functions and to prepare for industry recognized IT certifications – e.g., CompTIA® A+™, Network+™, Server+™; Microsoft® MCSA and MCSE; Novell CNA and CNE; and many more.

Training, “Just-In-Time” reference, and practical lab exercises for the complete IT staff

This collection of courses, references, and practice labs covers the networking and operation systems technologies common in corporations today. The library is both broad and deep in its content – not only because it spans all of the dominant technologies – but also through the inclusion of many legacy OS versions as well as the latest releases. So training and support are available for the system configuration as it exists today – and when an upgrade is imminent – materials to support the new configuration are included and ready to be accessed. Typical networking roles that are supported:

Systems Engineer

Selects server and client technologies, designs secure networks, and manages network implementation. This role is certified by industry-recognized credentials MCSE, CNE, and CompTIA's Security+™.

Systems Administrator or Network Administrator

Adds, modifies, and deletes accounts and allocates access rights for network users, maintains systems and networks, and manages applications, upgrades, and network modifications. These roles are certified by industry-recognized credentials MCSA, CNA, and CompTIA's Security+.

Technician or Help Desk Specialist

Installs networks, network devices, and server applications, troubleshoots network problems, and mans IT helpdesks. These roles are certified by various CompTIA credentials including A+, Network+, Server+, Linux+™, and MCDST.

Training partner to the technology leaders

Element K is proud to be a training content provider to the world's leading network and OS vendors – Microsoft and Novell. Element K was selected by Microsoft to develop e-Learning for Official Microsoft Learning Products that enhance skills and knowledge using Windows 2003 Server. We were chosen as the first Microsoft Content and Service Provider, allowing us to produce and distribute Official Microsoft Learning Products to Microsoft's Authorized Training channel. Element K has rights to produce and distribute Novell Authorized Curriculum to Novell Training Service Partners located in North America. Our relationship with Novell also provides that all our existing online courses are “authorized” by Novell and allows us to produce future online courses that are a derivative of Novell authorized courseware.

Reference tools and support

Element K's integration of online reference tools and virtual labs, including a custom collection of the most relevant books on networking and operating systems topics, is unmatched in the industry. Popular courses are available in a collaborative format with access to an instructor, in addition to the convenient and highly regarded self-study format. Topical “discussions” happen virtually through Element K KnowledgeShare threaded message boards, designed to give students a place to get peer feedback and assistance.

Element K delivers Learning Solutions that combine our core assets — catalog e-Learning, platform, courseware, custom content, system integration and services
